Year	2024	Category	Boat Engines and Outboards
Hull Style		Hull Type	
Power Type		Stock Number	DF75A
Condition	New	State	New Zealand
Suburb	Whangarei	Engine Make	

Description

Suzuki outboards have once again reinvented the category with the DF75A. Suzuki's new generation of four-strokes, the DF75A is a showcase of advancements and achievements - like digital sequential electronic fuel injection, a powerful 2.59:1 final drive ratio, and a zero-maintenance self-adjusting time chain. All of this comes in addition to Suzuki's Lean Burn Control System, and newer models also sport the optional Suzuki Troll Mode System.

The DF75A hosts digital sequential electronic fuel injection, meaning it reads the electronic control unit monitors throttle setting, engine RPM, cylinder wall and air-intake temperature and atmospheric pressure all at once. All of these considerations cause the fuel injection to enter the combustion chamber at the most optimal opportunity. The benefits are smoother and faster acceleration, crisp throttle response and quick, reliable starting, no matter what the temperature is.

The DF75A 4-stroke outboard is the lightest in its class at 156kg, allowing Suzuki's mid-range outboard category to a wide array of fishing and family boats. Being the lightest in class, it's extraordinarily compact yet extremely powerful and exceedingly reliable.
